CA Clinics are focused on helping doctors navigate the regulatory pathway for prescribing plant-based medicines in Australia and New Zealand.

Our clinics work closely with patients who suffer from indications for which there is some evidence that plant-based therapies may be beneficial. We work in accordance with TGA Guidance documents.

We welcome referrals from GPs or Specialists who feel their patients may potentially benefit from these treatments. Our doctors consult with patients nationwide through our telehealth service.

Our doctors are all AHPRA registered medical professionals who are familiar with qualifying symptoms or conditions for plant-based treatments, and products legally available for prescription.

Our medical team is backed by an allied health team with knowledge and experience in regulatory requirements for medicinal cannabis approvals. Our team collaborates closely with patients' existing GP and Specialist(s) to keep them informed about the progress of consultations and approval applications. We also provide ongoing monitoring and reporting of patient status to patients' clinicians.

Products prescribed by our doctors include registered medicines as well as unregistered products compliant with TGO93 and made available under Regulation 5 of the Customs (Prohibited Imports) Regulations 1956 for supply of unregistered medicinal cannabis products.

To refer a patient, please complete the Referral Form on the reverse page, or contact us on 1300 991 477 or info@caclinics.com.au.
